

The FuelCube is a double-walled stationary fuel tank built for onsite equipment refueling and backup fuel supply. Fuel Cubes offer increased portability and security over standard bulk tanks. With an included pump, lock box, and containment system, Fuel Cubes provide you with an all-in-one fuel storage solution for your jobsite or yard.

One Cube - Many Applications

Onsite Fuel Supply - Keep fuel strategically located onsite to refuel construction machinery without waiting for fuel deliveries.

Fleet Refueling - In remote locations or at your facility, the FuelCube can refuel your fleet and reduce unneeded downtime.

Generators & Auxiliary Equipment - Connect to 1 diesel powered piece of equipment & dispense fuel by pump at the same time.

Contact Ricochet Fuel Distributors to get your Fuel Cube delivered today!
