

# What is FuelCloud?

A fuel management system that uses lightweight hardware and a powerful online dashboard to give customers oversight and control over their fuel inventory.

## How it works

FuelCloud combines hardware, a web portal, and a mobile application to give users real-time insight into their fuel.

### Web

Check inventory, run reports, and manage pump permissions from anywhere through the FuelCloud's cloud-based web dashboard.

### Mobile

Authorized drivers can use the FuelCloud mobile app to access pumps and get fuel.

### Hardware

Easy-to-install hardware controls pump use on-site and provides real-time fuel data.

## FuelCloud vs Competition

### Software first, hardware light

The most powerful system at the most competitive price.

### Constantly updating software

The only FMS with a dedicated, full-time development team.

### Straightforward fees

Based on sites. No per pump fees. Unlimited admins, transactions, and controls.

### Federal and State tax refund tools

Fill out tax forms with the click of a button.

### Unlimited custom reports and open API

Receive your reports in .xls .csv or .txt via email whenever you need it.

### 24/7 US-based support

Reach out to our internal support team day or night at (503) 379-1980.

### Doesn't require a dedicated circuit

Wire into your existing power lines making install quick and simple.

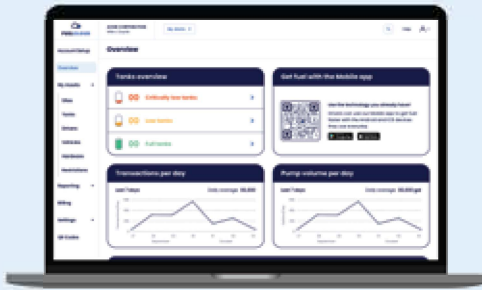

### Library of integrations

Our in-house development team is always building out what we connect to.

### Only W&M certified app in the USA

We produce reliable, verifiable data for fuel reselling.

## Commercial-level site management at small business prices

FuelCloud is a Fuel Management System that allows users to track and control every gallon in their on-site tanks for a fraction of the cost of traditional systems. Manage inventory, run custom reports, automatically file tax forms, and protect your fuel with the click of a button.

### Standard

- ✓ Unlimited users
- ✓ 24/7 support
- ✓ QR/Barcode scanning
- ✓ Remote updates

Download on the App Store

GET IT ON Google Play

### iPad Bundle

- ✓ iPad secured under lock and key
- ✓ Heated, cooled, and climate controlled
- ✓ Comes with iPad, iPad Case, and Extreme Weather Enclosure

## Where FuelCloud excels:

- **Organizations that are already using online software for their business**  
(e.g. Salesforce, Quickbooks, or Fleet Telematics software)  
These businesses are comfortable with how web-based tools can improve their business and may be particularly interested in how FuelCloud integrates with their other software.
- **Organizations that are using an older Fuel Management system**  
These organizations have demonstrated that they want to protect and manage their fuel, but may have specific issues with how their current fuel management system works and are looking for an upgrade.
- **Companies that have both off-road and on-road vehicles**  
These organizations should be filing for tax refunds for their off-road fuel use. FuelCloud's reporting tools makes tax forms easy to complete, in turn saving staff time and energy.
- **Companies manually tracking fuel transactions with pen and paper records**  
These organizations almost certainly have a few horror stories of trying to reconcile fuel use from paper records. An easy digital system like FuelCloud solves their problems.
